NEW!! Fox Model FT1 Product Launch!

Fox is pleased to announce the launch of its newest product, the Model FT1! Take a look at these key features:

- DDC-Sensor™ Technology
- Gas-SelectX™ gas menu selection tool
- Calibration Validation with Zero CAL-CHECK™
- FM/FMc, ATEX, and IECEx Approvals (pending), CE approved
- Free FT1 View™ Software
- Standard USB communication port
- Optional RS485 Modbus RTU or BACnet MS/TP Communication Protocols

The Model FT1 is equipped with the Direct Digitally Controlled sensor technology – the new DDC-Sensor™ - that provides the platform for a revolutionary new gas selection feature: Gas-SelectX™. Each FT1 is programed to measure multiple gases available in the Gas-SelectX™ gas selection menu which contains 5 pure gases and a mixed gas feature to choose from. The mixed gas feature allows the user to input the percentage of Methane to Carbon Dioxide to Nitrogen to achieve the precise... Learn More!

Launch of the NEW FT1 Configurator!

Fox has designed a new configurator to support the launch of the FT1: the FT1 Configurator. After logging in and entering important information about sizing and process conditions, this helpful online tool will provide the user with a unique AppID that can be sent to Fox for further information or a quote.
